

1. What is Playwright?

A modern end-to-end automation framework developed by Microsoft supporting Chromium, Firefox, and WebKit.

2. Which browsers does Playwright support?

Chromium, Firefox, and WebKit.

3. Why choose Playwright over Selenium?

Built-in auto-waiting, parallel execution, network interception, and faster execution.

4. What is auto-waiting?

Playwright automatically waits for elements to become actionable before performing operations.

5. What is Browser Context?

An isolated browser session similar to incognito mode.

6. What is Page Object Model (POM)?

A design pattern separating page locators and test logic for maintainability.

7. How to run tests?

Use command: `npx playwright test`

8. What is headless mode?

Browser runs without visible UI.

9. How to take a screenshot?

Use `page.screenshot()` method.

10. What causes flaky tests?

Hard waits, unstable locators, dynamic DOM changes.

11. Playwright Interview Question 11?

Refer to detailed structured explanations in your master guide. Be prepared to explain with examples.
